

Protecting Pukunui on Rakiura

Community drop-in sessions in Oban

Thursday 10 April, 2025

The critically endangered Southern New Zealand dotterel/pukunui is at serious risk, with only 101 birds left. The Department of Conservation (DOC), supported by Zero Invasive Predators (ZIP), is proposing a predator control operation this winter to help protect pukunui breeding grounds.

Come by to learn more about the proposed operation, why it's needed, and how potential impacts will be managed. We want to hear your feedback and answer any questions you have.

Thursday 10th April 2025

Two sessions:

- 10am – 4pm
- 7pm – 9pm

St Andrews Anglican Church Hall
110 Excelsior Road, Oban

No bookings required, just come by when it suits you.

You can email pukunui@doc.govt.nz at any time to share your thoughts.
